

# Cervical Cancer Incidence

**Irene Hall, Ph.D., CDC**

# CDC's National Program of Cancer Registries

# Incidence of Cancer of the Cervix 1995-1998

## State Summary

---

- ◆ **11 States provided information for white women**
  - **HMRC incidence ranged from 6.1 to 15.3/100,000**
  - **ORC incidence ranged from 5.1 to 11.2/100,000**
  - **State incidence ranged from 4.4 to 11.4/100,000**
  
- **HMRC local stage ranged from 26.5% to 70.0%**
- **ORC local stage ranged from 49.4% to 60.0%**
- **State local stage ranged from 52.4% to 62.0%**

# Incidence of Cancer of the Cervix 1995-1998

## State Summary

---

- ◆ Higher incidence and lower % local stage in rural counties may indicate early detection problems in some states
- ◆ Limitations
  - Data availability
  - Small numbers for subpopulations
- ◆ Conclusions
  - Improve cancer surveillance
  - Data may indicate need for greater outreach for early detection
